

ABDELMOUGHTE NAOUMI

CYBERSECURITY AND DIGITAL TRUST ENGINEERING STUDENT

CONTACT

- +212 605609142
- abdelmoughite.naoumi@gmail.com
- El jadida maroc
- in/abdelmoughite-naoumi

SKILLS

- Penetration Testing
- Cryptography
- System Administration
- Scripting and automation
- Networks and Systems
- Network Security solutions
- Programming and Development
- Web Development:
- Databases administration
- Cloud computing
- IAM/IAG
- GRC
- Digital forensics

CERTIFICATIONS

- AWS Certified Solutions Architect
- AWS Cloud Practitioner
- CompTIA Security+ (In Progress)
- TryHackme (Jr penetration tester, Web Fundamentals, Pre security, introduction to cybersecurity.)
- Cisco Network Security
- Cisco ethical hacker
- Google Introduction to Cybersecurity

LANGUAGES

- English (Fluent)
- French (Fluent)
- Arabic (Native)

PROFILE

Driven engineering student with a strong foundation in cybersecurity, cloud architecture. Experienced in building secure systems, conducting penetration tests, and working on real-world security labs and projects. Passionate about learning by doing and continuously exploring new technologies.

WORK EXPERIENCE

- OCP Group**

JUL 2024 - AUG 2024

auditCyber Security Consultant

 - Automation of JLS performance meetings
 - Development of centralized solution using python
 - DCS (Distributed Control System) security analysis and audit

PROJECTS

- Securing big data ecosystems (Hadoop)**

Ensa El Jadida | Ongoing PFA

 - Implementing security measures for a Hadoop cluster
 - Managing access control and permissions (Kerberos, ACLs)
 - Encrypting data and securing communications
 - Monitoring and threat detection (auditing, logs, IDS)
- Study and deployment of a secure IT architecture with IPS/Firewalls Stonesoft 1030 And SMC**

Ensa El Jadida | PFA

 - Study on detection and prevention systems
 - Market study (fortinet,palto alto,cisco...)
 - Implementation and deployment
- Engineering projects**

Ensa El Jadida

 - Web-based Inventory Management Application “AtlasWare”.
 - Secure Hospital Management Application (Python, PyQt5).
 - Resilient IT Logistics—ERP Implementation Project
 - risk mapping model for Industry 4.0 with IoT resilience strategies

EDUCATION

- Cybersecurity and digital trust**

2021-2026

Ensa El Jadida | Chouaib Doukali university

Gained expertise in penetration testing, cryptography, network security, and digital identity protection, focusing on securing systems and mitigating risks.
- AWS cloud computing Alumni**

2024

ALX africa

design, deploy, and manage secure and scalable cloud solutions for businesses
